

INTEND

ESA Business Incubation Centre Darmstadt managed by cesah

Profile

INTEND Geoinformatik GmbH develops web-, desktop- and mobile technology for spatially related information systems (GIS). Since its foundation in 2000, the company developed continuously and has a team of 29 employees at the company

sites in Kassel and Munich. INTEND is the market leader in the field of forestry geoinformatics. Almost all the country's forestry administrations in Germany are working with INTEND's GIS applications.

Products and Services

The web-based Geographical Information System WebLine and the optional mobile component WebLine mobile are offered as a service (software as a service, "SaaS"). The user can edit and visualise the spatial or factual data of his forest enterprise over the internet, print it or send this information via PDF document.

With the mobile component, data can be retrieved from, edited and returned to geo-servers using a PDA with GPS and GSM while working in the field. Thus always the most current data are available on the server and can be used by other users.
